## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 5,804,820 to Evans et al. is the reference closest to the claimed invention. Evans et al. disclose a method for determining a property of a material, comprising the steps of: (a) inducing, within said material, gamma radiation comprising energies greater than about 3 MeV; (b) measuring a first gamma ray spectrum and a second gamma ray spectrum resulting from said induced gamma radiation; and (c) normalizing said first and said second gamma ray spectrum in a first energy region. However, Evans et al. do not teach (d) measuring down scatter gamma radiation in a second energy region of said normalized first and second gamma ray spectra and (e) determining said property from said measure of down scatter radiation; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
